

WELCOME TO MY PORTFOLIO

Hi, I'm Aqib Shaik

Computer Science graduate student interested in software development, cybersecurity, networking and emerging technologies.

View My Projects

About Me

I am a Computer Science graduate student at the University of New Haven. I am passionate about software development, cybersecurity, networking and solving real-world problems using technology.

Location

Connecticut, USA

Field

Computer Science

Languages

English, Telugu, Hindi and Spanish

Education

2025–Present

Master of Science in Computer Science

University of New Haven
Connecticut, USA

Completed

Bachelor of Science in Computer Science Engineering

Anwarul Uloom College
India

Projects

A selection of academic projects involving IoT, networking and digital forensics.

Smart Curtains IoT

Smart Curtains – IoT System

PIR and temperature sensors

Automatic curtain control

Tinkercad prototype

[View Project](#)

Bank Network

National Bank Network

Enterprise network design

Subnetting, VPN and security

Cisco Packet Tracer

[View Project](#)

Digital Forensics

Digital Forensics Labs

Digital evidence investigation

HxD, OSForensics and Autopsy

Forensic documentation

[View Project](#)

Experience

Project-based technical experience developed through graduate coursework and laboratory assignments.

Spring 2025

IoT Development Experience

Smart Curtains Project

- Worked with PIR and TMP36 sensors
- Designed automation logic in Tinkercad
- Tested sensor input and actuator output

Spring 2026

Network Design Experience

National Bank Network Project

- Designed logical and physical network layouts
- Worked with subnetting, VPNs and security
- Used Cisco Packet Tracer

Fall 2025

Digital Forensics Experience

Digital Forensics Labs

- Examined and documented digital evidence
- Used HxD, OSForensics and Autopsy
- Completed forensic analysis exercises

Blogs & Articles

Topics I have researched and plan to develop into technical articles.

Wi-Fi Security

Understanding WPA3 and Modern Wi-Fi Security

A short article about WPA3 security improvements, encryption and protection against wireless attacks.

[Read Article](#)

Phishing Prevention

How to Recognize and Prevent Phishing Attacks

An overview of common phishing techniques and practical ways users can protect their information.

[Read Article](#)

AI Medical Diagnosis

Artificial Intelligence in Medical Diagnosis

An article exploring how classification algorithms can support accurate and efficient medical diagnosis.

[Coming Soon](#)

Technical Skills

Technologies and technical areas developed through coursework, projects and laboratory experience.

Programming

C++, Python and MATLAB

Cybersecurity

Wi-Fi Security, WPA3 and Ethical Hacking

Networking

Cisco Packet Tracer, Subnetting and VPN

Digital Forensics

Autopsy, HxD and OSForensics

Systems Administration

Linux, Windows Administration and
Network Management

IoT Development

Tinkercad, PIR Sensor and TMP36
Sensor

Certifications

Professional learning and certification areas supporting my technical development.

Badge

Ethical Hacking

Cybersecurity Certification

View Certificate

Badge

C++ Programming

Programming Certification

View Certificate

Badge

Full Stack Development

Development Certification

View Certificate
